Hello,

Thank you for purchasing this library, I hope you will enjoy it and that you found what you were looking for, to illustrate your projects..

Guns and explosions Pack:

All my sound effects are made from scratch or recorded by myself. The gun sounds are not actual guns that were recorded. Although I made a lot of field and studio recordings for this album, and I used actual gun sounds, the final sound effects are the result of a mix of different sound elements, sound design and tweaking work.

The reason I choose this approach is to create "larger than life sounds" which is often required in films, documentaries and video games to give a much stronger impact to a scene.

We all remember the "punch in the face" sounds from Indiana Jones !

You can check my website where you will find a large quantity of sound effects of all kinds and for all purposes, on my website:

<http://www.ogsoundfx.com>

You might even be lucky and win free samples by subscribing to the OGsoundFX newsletter, or find out if there are any promotions that you could benefit from.

Feel free to contact me for any question, enquiry, or custom order:

info@ogsoundfx.com

Enjoy your new sounds and I wish you the best of luck with your projects !
